

A Genome-anchored PsbO/OEE1 collinearity landscape

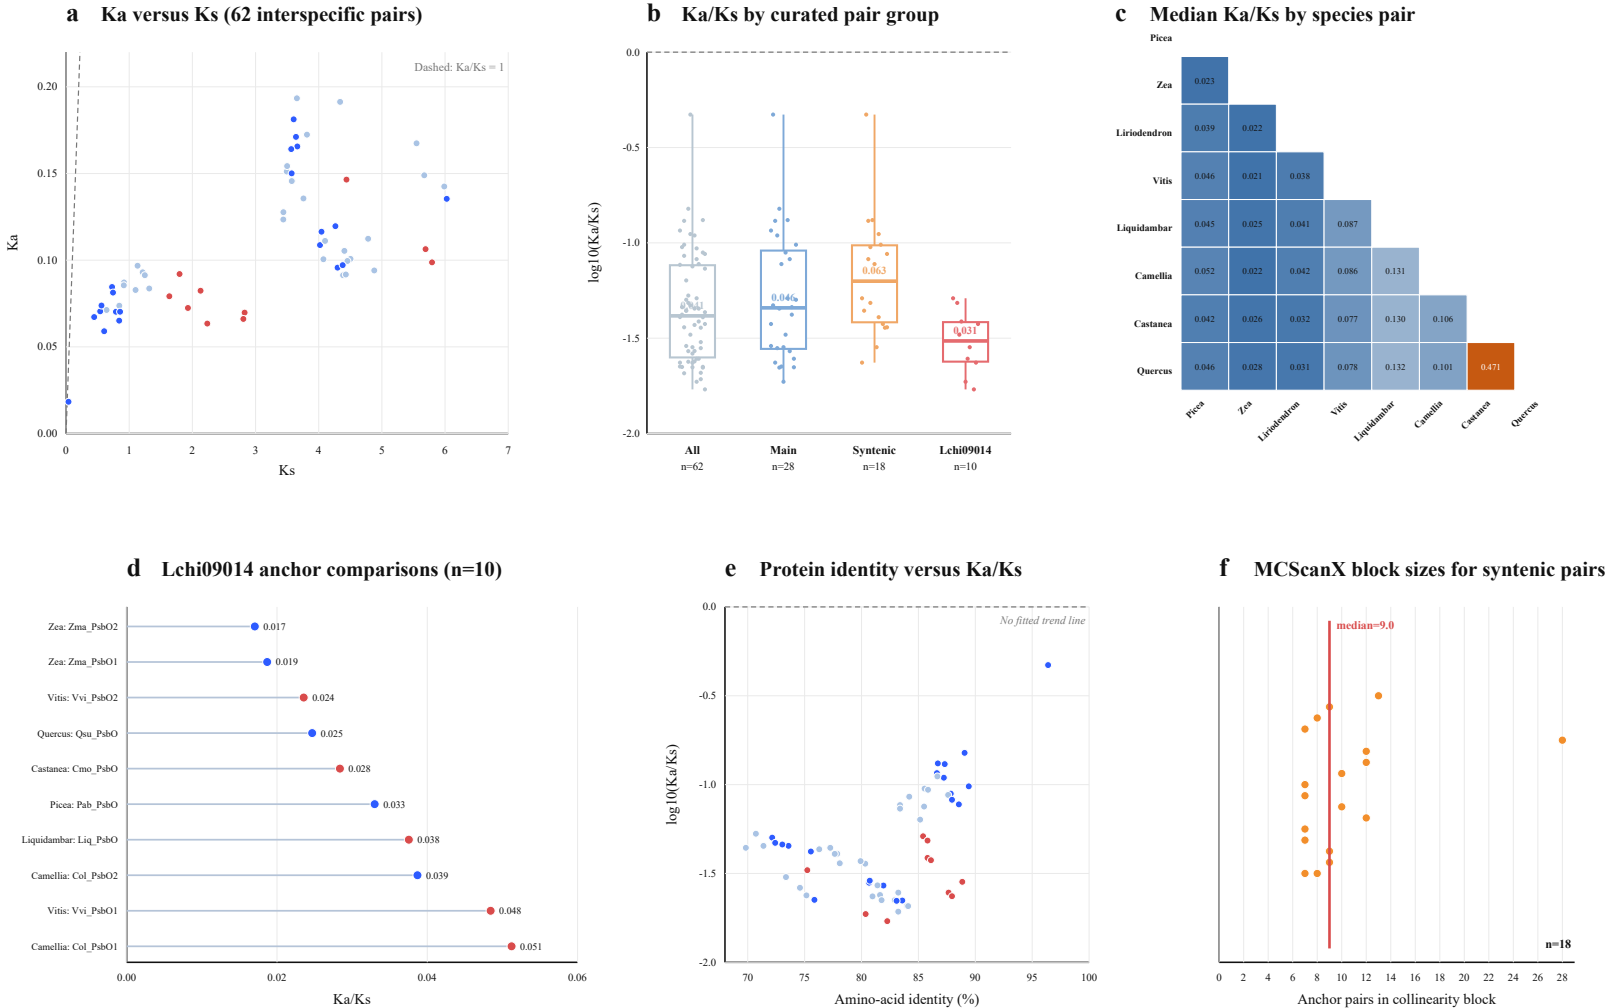

Gray curves are retained background anchors; colored curves identify curated PsbO/OEE1 copies.

*Hybrid-sweetgum collinearity was projected to the *Liquidambar formosana* reference assembly. Transcriptome-only taxa are not plotted.

B Evolutionary-constraint evidence for OG0010580 (PsbO/OEE1)

12 members; 62 valid interspecific pairs; Goldman-Yang estimates; all Ka/Ks values < 1.

Protein: MAFFT v7.526; codon alignment: PAL2NAL v14; Ka/Ks: KaKs_Calculator v2.0, GY model; synteny: MCSanX v1.0.0.
